INDEX TO VOLUME XXVII

Adams, J. F., Primitive elements in the K-theory of BSU . . 253
Baker, R. C., Riemann sums and Lebesgue integrals . . . 191
Batty, C. J. K., An extension of an inequality of R. Holley . . 457
Berrick, A. J., The Samelson ex-product 173
Bollobás, B., Daykin D. E., and **Erdös, P.**, Sets of independent edges of a hypergraph 25
Butler, G. J., Oscillation theorems for a non-linear analogue of Hill's equation 159
Chang, S. H., Periodic solutions of $(a(t)x')' + f(t, x) = p(t)$ . . 105
Chen, Y. M., Note and corrigendum 511
Clements, G. F., Intersection theorems for sets of subsets of a finite set 325
Corner, A. L. S., On endomorphism rings of primary abelian groups II 5
——, The independence of Kaplansky's notions of transitivity and full transitivity 15
Daykin, D. E., *see* **Bollobás, B.**
De Lyra, C. B., *SHM*-maps of *CW*-groups 139
Dixon, P. G., Varieties of Banach algebras 481
Dunstan, F. D. J., Matroids and submodular functions . . 339
Eggar, M. H., Non-homotopic maps between *CW*-complexes . 47
Erdös, P. *see* **Bollobás, B.**
Fegan, H. D., Conformally invariant first order differential operators 371
Gardiner, A., Arc transitivity in graphs III 313
Giambalvo, V., Cobordism of spin manifolds with involution . 241
Goodey, P. R., Some results concerning the dimension of the space of compact subsets of the unit interval 467
Green, J. A., Lehrer, G. I., and **Lusztig, G.**, On the degrees of certain group characters 1
Hamilton, A. J. S., The triangulation of 3-manifolds . . . 63
Hartley, B., Splitting over the locally nilpotent residual for a class of locally finite groups 395
Hastings, S. P., On the existence of homoclinic and periodic orbits for the Fitzhugh-Nagumo equations 123
Haydon, Richard, An extreme point criterion for separability of a dual Banach space, and a new proof of a theorem of Corson . 379
Hilton, A. J. W., A theorem on finite sets 33
Hilton, Peter, and **Roitberg, Joseph**, On the Zeeman comparison theorem for the homology of quasi-nilpotent fibrations . . 433

Holt, D. F., Doubly transitive groups in which the stabilizer of two points is dihedral 267
Jones, Burton W., A variation on a problem of Davenport and Diophantus 349
Kenku, M. A., A note on involutory Weil curves 401
Lam, T. Y., Series summation of stably free modules 37
Leedham-Green, C. R., and **McKay, Susan**, On p-groups of maximal class I 297
Lehrer, G. I., see **Green, J. A.**
Lusztig, G., see **Green, J. A.**
McKay, Susan, see **Leedham-Green, C. R.**
Mahowald, M., and **Milgram, R. James**, Operations which detect Sq^4 in connective K-theory and their applications 415
Martin, Nigel, Locally flat embeddings of homotopy manifolds . 59
Milgram, R. James, see Mahowald, M. . . . . .
Montesinos, José M., Three-manifolds as 3-fold branched covers of S^3 85
Mustonen, V., Strongly nonlinear eigenvalue problems . . 489
Nakagawa, Yoko, Elementary disks and their equivalences . . 355
Noakes, J. L., Unstable J-invariants 51
Ntinos, A. A., Lengths of instability intervals of second order periodic differential equations 387
Oberlin, Daniel M., The majorant problem for sequence spaces . 227
Peters, C. A. M., and **Simonis, J.**, A secant formula . . . 181
Petersen, G. M., and **To, T. O.**, An extension of metric density . 463
Roitberg, Joseph, see **Hilton, Peter**
Sands, A. D., Strong upper radicals 21
Sawyer, D. B., Convex sets and the hexagonal lattice . . 217
Schechter, Martin, Scattering theory for pseudodifferential operators 111
Seymour, P. D., A forbidden minor characterization of matroid ports 407
Shinbrot, Marvin, The Cauchy problem for the Navier-Stokes equations 135
Simonis, J. see **Peters, C. A. M.**
Spain, P. G., A generalisation of a theorem of Grothendieck . 475
Thomas, Doreen A., On general matrix measures 95
To, T. O. see **Petersen, G. M.**
Toland, J. F., Global bifurcation for k-set contractions without multiplicity assumptions 199
Wilson, George, $SO(3)$-equivariant maps of spheres . . . 263
